## **PennDOT Clinton County Maintenance Work Schedule for the Week of May 6**

**Clearfield, PA** – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Clinton County the week of May 6. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Clinton County for the coming week is as follows:

### **Base Repair:**

- Route 477 (Long Run Road/Mill Street/Bull Run Road) in Green Township. Monday, May 6, through Friday, May 10. Flaggers in the roadway will provide traffic control during daylight hours.

Base repair is intended to repair fatigue cracked, potholed or distorted pavement sections and restore the structural integrity of the pavement. All distressed material within the area, including the material beneath the asphalt, is removed and replaced with sound material. The new material is then compacted before being overlaid with new asphalt. Base repair extends the service life of good and fair roads and provides a smooth, safe ride for motorists.

### **Bridge Maintenance & Cleaning**

- Route 220 between Mill Hall and Avis in Castanea and Wayne townships. Monday, May 6, through Friday, May 10. PennDOT will implement short-term lane closures while completing this work.
- Route 64 between Lock Haven and the Centre County line. Monday, May 6, through Friday, May 10. Flaggers in the roadway will provide traffic control during daylight hours.

Pennsylvania has some of the oldest bridges in the country, with an age of more than 50 years on average. Preventive maintenance is vital in extending the life of the structures. As such, PennDOT maintenance crews perform some bridge deck patching and structural repairs.

### **Manual Patching**

- Route 664 (Coudersport Park) in Cummings Township near the intersection of Queen's Run Road. Monday, May 6, through Friday, May 10. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 1006 (Cemetery Street) in the Village of Woolrich and Pine Creek Township. Thursday, May 9, and Friday, May 10. Flaggers in the roadway will provide traffic control during daylight hours.

Most permanent pothole patching is completed in the spring/summer when temperatures stay consistently above freezing. If maintenance crews were not repairing potholes, the road surface would break up further and require more expensive corrective measures.

### **Vegetation Management**

- Interstate 80 from mile marker 170 in Porter Township to mile marker 194 Greene Township. This work takes place off the roadway and has minimal, if any, traffic impact.

Mowing, herbicide spraying, and selected tree thinning help maintain a safe roadway free of obstructing vegetation, improving visibility to spot signage, traffic control devices, and other motorists, bicyclists, pedestrians, and animals approaching the road. Additionally, a well-maintained roadside can improve drainage and prolong the life of the roadway.

PennDOT urges motorists to exercise caution in these and all work zones to ensure their safety and the safety of county maintenance staff.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
