PennDOT Juniata County Maintenance Work Schedule for the Week of May 20

Clearfield, PA – The Pennsylvania Department of Transportation (PennDOT) announced the following schedule of maintenance activities in Juniata County the week of May 20. PennDOT performs year-round maintenance in its mission to provide a safe, efficient transportation system, and the scope of work in Juniata County for the coming week is as follows:

Surface Treatment

- Route 235 from the intersection of Lake Run Road in Greenwood Township to the Perry County line. Monday, May 20. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2021 from the intersection of Route 235 to the Perry County line. Monday, May 20. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2017 (Dimmsville Road/Eventdale Road/Eventdale Hill Road/Middle Road) in Monroe and Delaware townships. Tuesday, May 21. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2028 (Goodville Road) from the intersection of Dimmsville Road in Greenwood Township. Tuesday, May 21. Flaggers in the roadway will provide traffic control during daylight hours.
- The entirety of Route 2019 (Seven Stars Road) from the Perry County line to the Snyder County line. Wednesday, May 22, and Thursday, May 23. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2020 (Zeiders Road/Ridge Road) from the intersection of Richfield Road to the intersection of Dressler's Ridge Road in Greenwood Township. Wednesday, May 22. Flaggers in the roadway will provide traffic control during daylight hours.
- Route 2014 (Lauver Valley Road) from Eventdale Road to Richfield Road in Monroe Township. Thursday, May 23. Flaggers in the roadway will provide traffic control during daylight hours.

Commonly known as “oil and chip” or “sealcoat,” this operation is a preservation strategy used to maintain mainly low-traffic-volume roads for five to seven years. It is also used on high-volume roads to extend pavement life between resurfacings. Generally, it takes stones about two days to fully bond in the hardened asphalt. Motorists should reduce their speed on these roads until the stones fully adhere to the asphalt. This maintenance seals the road surface to keep water out, restores the friction of the surface to enhance traction, and is very cost-effective.

This schedule is subject to change due to weather conditions, emergencies, or other unforeseen interruptions.

Customers can report road concerns by calling 1-800-FIX-ROAD. If calling after hours, please leave a name and phone number.
