

Frankford Avenue over Frankford Creek:

Project Purpose:

To maintain a safe and efficient travel way through this section of the City of Philadelphia.

Project Need:

The Frankford Avenue bridge is a fracture critical structure on an arterial roadway in the City of Philadelphia. The bridge is in poor condition as per the most recent inspection report and is currently posted for load limits for 16 single tons and 22 tons combination. The bridge rehabilitation is needed to eliminate the current weight restrictions on the bridge.
