

Polish Paver

City of Williamsport, Lycoming County

Problem/Challenge Addressed

We wanted to create something that would allow us to complete the most pothole repairs as possible with the least amount of equipment and personnel.

Method/Process/Product to Resolve Challenge

Using steel, a welder, pins, bolts and 24 hours of labor, we created something that would allow more blacktop to be put down with less work. This only cost us \$600.

Results/Key Takeaways

This has saved us a lot of money and has allowed us to repave roads without a paver. Plus, it is now just a 2-person job.
