Looking Ahead in 2022

When your team was asked to provide the most important and interesting developments for the 2022 Pathways Program, the answers were as varied as you are. From innovative changes to the traditional methods of overburden, to the big news of tolling on the Schuylkill Expressway, to the continued commitment to the Irish Creek Bridge, this year promises a lot for PennDOT.

Transportation\: Vital

In the following potential near and not so remote future, transportation will play a critical role in the success of the Pathways Program. The following items were identified by our team as some of the most important and interesting developments for 2022:

A. Managed Lanes
   B. Doing Nothing
   C. Tolling
   D. Mileage-Based User Fees

By the Numbers: Major Bridge Project Public Meetings

PennDOT has identified and set up to conduct public meetings to gather input from the communities that are affected by the major bridge projects. The meetings will be held from January 2022 to May 2022 at various locations throughout the state.

Pathways Alternative Transportation Options

In addition to the traditional modes of transportation, there are alternative options available for those who want to avoid the traffic and congestion. These options include:

- Public Transportation
- Bicycling
- Walking
- Carpooling

More information on alternative transportation options is available on the Pathways website and at the public meetings.

Contact Us

Please feel free to contact us with any questions or concerns regarding the Pathways Program. We are always available to assist you.

Horse Bridge Public-Private Partnership (P3)

In addition to the projects mentioned above, there are other projects under consideration that may be included in the Pathways Program for 2022.

- Major Bridge Public-Private Partnership (MBP3)
- Tolling

Looking forward, the Pathways Program promises to offer a variety of options and opportunities for travelers and community members alike.
